The Reovi K12 is a compact, dual-function mini fridge, designed for precise temperature control in a small, efficient footprint, making it ideal for storing medications, peptides, and everyday drinks. With both cooling and heating capabilities, it can chill contents down to 32°F or warm them up to 140°F under standard ambient conditions, offering flexibility well beyond a typical beverage fridge. Its lightweight, portable design, universal voltage compatibility for home or travel use, and quiet, low-power operation make it a practical solution for personal wellness storage, clinical environments, offices, or bedside convenience - where consistency, reliability, and space efficiency matter most.
